Verosol Panel Glide System

Use, Care and Maintenance

Verosol Panel Glide System is an attractive to traditional curtains, their contemporary appearance makes them ideally suited as coverings for sliding and bi-folding doors.

- When you choose to open a window or door, be sure to fully open the panels, otherwise the fabric will act like a sail and a strong breeze could catch and damage the panels.
- Avoid exposure to wind or rain, as rain blown onto the blind might stain the fabrics and these spots could be difficult to remove.

Operating Panel Glide System

- Verosol Panel Guide System is operated by either draw cord or wand. Use the cord or wand to operate the blind.
- **DO NOT** attempt to move panels by handling the fabric.

Cleaning Panel Glide System

Choosing the best method of cleaning will depend on the fabric of your blinds.

- Dust with a soft brush or gently sponge clean with warm soapy water, leaving the blinds closed to dry.
- Spot clean any marks with a soft damp cloth, make sure the cloth damp not wet to guard against leaving water marks.
- Fabrics such as Ultra, Mirage and Satin may be spot cleaned. But be careful not to crease the fabric.

Verosol Metallised fabrics are anti-static, meaning the product resists air-born dust.

- If dusting is required, use a soft brush or dusting cloth.
- Dirt marks or spills on metallised fabric must be cleaned ultrasonically. Think of this process the same as taking your silks to the dry cleaners.
- If the fabric in your blinds have a metallised backing, **DO NOT** spray window cleaner on or near the fabric.

Please contact your Verosol Retailer if you have any further questions or concerns about your Verosol Blinds.
