

INTERNAL AUTOMATED ROLLER SYSTEMS

LARGE HELIOSCREEN MOTORISED

APPLICATION HM 80 00

The HM 80 00 internal motorised roller blind provides the solution for large span windows in commercial and domestic interiors. The roller tube features reinforced ribbing that assists the tube in carrying the additional weight of the fabric, providing options for greater drops. The diameter of the tube also plays a significant role in reducing the amount of revolutions required to operate the blind enabling the fabric to rotate on the tube efficiently. The system has the capability of linking multiple blinds and is easily integrated into automation systems. The HM 80 00 system carries Helioscreen's 5 year warranty.

SYSTEM SPECIFICATIONS HM 80 00

MINIMUM WIDTH	800mm
MAXIMUM WIDTH	3800mm
MAXIMUM DROP	3600mm

TECHNICAL INFORMATION HM 80 00

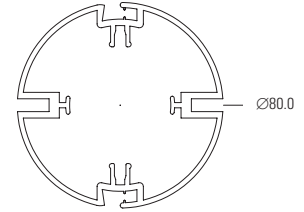

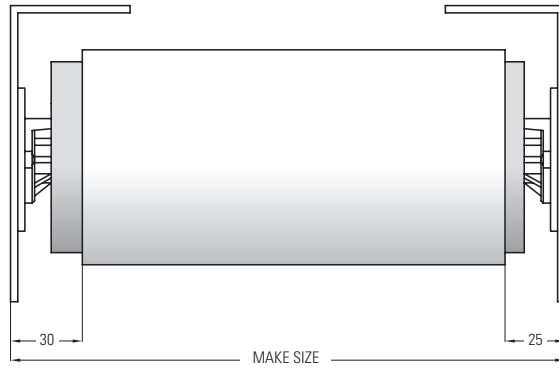

BRACKETS	<ul style="list-style-type: none">• White or black steel• 50 x 100 mm fixing plate• Universal fixing points• Projection brackets – 125mm• Custom powder coating available
CONTROL END	<ul style="list-style-type: none">• Motor by Somfy – Remote controlled or wall switch• Single Channel or 4 channel remotes available
